

ORGANISATIONAL RESILIENCE

Dealing with a Disease Outbreak

In the event of a disease outbreak, all organisations have a key role to play in managing the risks to the health and safety of employees/volunteers and maintaining critical services.

Below is a simple 10 minute business continuity self-assessment based on a disease outbreak. The aim of the assessment is to highlight issues you need to consider to prepare for a disease outbreak that may disrupt your organisation.

Planning

	Yes	No	Don't know	Comments
1. Has someone been assigned responsibility for planning and preparedness in the event of a disease outbreak?				
2. Do you know where to obtain key information from e.g. Public Health England (PHE), World Health Organisation (WHO), Government, Health & Safety Executive (HSE)?				
3. Do you know which stakeholders (internally and externally) you would need to consult with?				
4. Have you carried out a 'high level' impact on your organisation e.g. financial assessment and strategic priorities?				
5. Have you agreed a high level strategy and plan for your organisation?				
6. Have you established authorities, triggers and procedures for implementation?				

Continuity

	Yes	No	Don't know	Comments
1. Have you considered cross skilling and alternative resources to keep critical activities running?				
2. Are you prepared for an increase take up of employee/volunteer welfare services and support?				
3. Have you prepared policies on sick leave and compassionate leave?				
4. Have you made arrangements to assure supplies?				
5. Have you considered the possibility of changes to your offer, your services, or your interaction with customers?				
6. Have you prepared an emergency communications plan?				

Business

	Yes	No	Don't know	Comments
1. Have you identified your organisation's critical activities and the resources required to support them e.g. people, processes, equipment, ICT?				
2. Have you considered the possible impact of employee/volunteer absences?				
3. Have you considered the possible impact of disruption to your supply chain?				
4. Have you considered circumstances under which you might decide to scale back or suspend operations e.g. events?				
5. Have you examined the likely impact of a disease outbreak on your market and on your customer requirements?				
6. Have you assessed the organisation's need for face to face meetings?				
7. Do you understand the special needs of some employees/ volunteers?				
8. Have you considered the issues for business related travel and people working overseas?				
9. Have you examined the extent to which others will be dependent on your organisation in the event of a disease outbreak?				

Workplace

	Yes	No	Don't know	Comments
1. Are plans to protect the workplace in line with the latest advice from key professional bodies e.g. PHE, WHO, Government, HSE? (Regular monitoring of advice is necessary). Some basic hygiene examples below.				
2. Have you prepared policies on hygienic workplace behaviour?				
3. Are plans in place for hand washing, hand hygiene, tissue disposal and other facilities?				
4. Are plans in place for frequent and effective cleaning of the workplace?				
5. Have you prepared policies on attendance by employees/ volunteers who are infected, or are suspected to be infected?				
6. Have work measures been identified to reduce potential for employees/volunteers who are in the workplace to infect each other e.g. social distancing?				
7. Are plans in place to reduce face to face contact with customers, suppliers and between employees/volunteers from different sites?				
8. Are policies in place on flexible work locations and flexible working times?				
9. Do you have the appropriate ICT infrastructure to support remote working and interaction?
